REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Referring to claim 1, 6-10, the prior art does not teach or fairly suggest monitoring for errors in the stored tag address comprises identifying at least one error using a single error correction code associated with the stored tag address in the tag memory, wherein the single error correction code is coded to provide error detection for the stored tag address and a plurality of configuration fields, in the scope and context of claim 1.

Referring to claim 11, 12, 13, 15, 17, the prior art does not teach or fairly suggest a tag memory to store tag addresses corresponding to addresses currently cached, and further to store an error correction code for each block of data stored in the tag memory, wherein each block of data is associated with a single error correction code, and the single error correction code provides error correction capabilities for the stored tag address and a plurality of configuration fields, in the scope and context of claim 11.

Referring to claim 18, 19, the prior art does not teach or fairly suggest a tag memory to store tag addresses corresponding to addresses currently cached, wherein the tag memory further stores an error correction code associated with each block of data, wherein each block of data is associated with a single error correction code, and the single error correction code provides error correction capabilities for the stored tag address and a plurality of configuration fields, in the scope and context of claim 18.

Referring to claim 23, the prior art does not teach or fairly suggest the means for monitoring comprises means for identifying at least one error using a single error correction code associated with the stored tag address in the tag memory, wherein the
